

Videoconferencing

Facts

Life-size room high-definition videoconferencing system

50" HD-ready display

ISDN connection (384k)

VGA PC connection to videoconferencing systems permits simultaneous H.239 dual-stream standard transmission of data and video during conferences.

Supported standards

H.323, SIP, H.320, H.264, H.263, H.261, H.239, AAC-LC

Single-display solution with dual-screen emulation or configuration with real dual-screen

The system supports video and telephone conferences as well as multipoint conferences with up to six locations.

Conferences are possible with both video and telephone participants.
