

Lighting system

The lighting system consists of individual lights (spots and washes) hung from a structure (Eurotruss) on the ceiling in the Ballroom or in the Gallery. Up to eight different lights produce the desired lighting effect and allow individual areas to be specially accentuated.

Spots

Individually adjustable

Silent and pivotable up to 540 degrees horizontally and 270 degrees vertically

Capable of eight different colours as well as of natural light using two additional filters

Quick and linear fades as well as various motion effects for show light

Possibility of projecting a logo in black and white or full colour (templates provided by separate offer)

Washes

Individually adjustable

Silent and pivotable up to 540 degrees horizontally and 270 degrees vertically

Capable of all RGB colours as well as of natural light using two additional filters

Quick and linear fades as well as various motion effects for show light

Possibility of projecting a logo in black and white or full colour (templates provided by separate offer)
